Comment : I work with an LP station located in the Mule Mountains of Arizona. As I understand it we are to have at least a three mile radius of coverage. Although we have mountains on three sides which will prohibit that coverage, we hope to achieve it through the mouth of the canyon when we move to our tower site. However, our HAAT rating is such that we are concerned that we won't be able to achieve that three mile radius even through the mouth of the canyon.

I urge the FCC to take the unique challenges of mountainous terrain into consideration with regard to LP stations.

I support the efforts of the FCC to increase the number of LPFM stations on the air and strengthen the viability of those stations that are already operating.

Sincerely,

Jill Thomas
